Chapter 8: The Logic of Conditionals § 8.1 Informal methods of proof Conditional elimination This  
method of proof is also known by its Latin name, *modus ponens* (literally, “method of  
affirming”—roughly, having affirmed the antecedent of a conditional, you may affirm the

consequent). From  $P$  and  $P \rightarrow Q$ , you may infer  $Q$ .

I'm fairly confident that LPL's exact Fitch format is unique to LPL. The general Fitch-style proof concept comes from Fitch himself though it is probably not much of a help for you. Here are answers to selected exercises, though I think your best bet is to ask your instructor specific questions or work with a group of classmates.
