Beak of the Finch Activity Name ____ On the Galapagos Islands today there are 13 species of closely related finches. The birds are all about the same size (10– 20 cm). The most important differences between species are in the size and shape of their beaks, and the beaks are highly adapted to different food sources.

Beak of the Finch Activity - Galapagos Conservancy

Beaks of Finches Lab Quiz Answers. 1.) a.) variation -- their were different tools with different types of grasping jaws b.) competition for resources -- some tools "beaks" were able to grasp the seeds they were competing for better than other "beaks" c.) adaptation -- some tools were better suited to pick up the seeds they were competing for than others because of their shape or size

Beaks of Finches Lab Quiz Answers - Google Docs

The Evolution Lab ANSWER KEY EVOLUTION 101 1. c 2. c 3. c 4. Sample answer: The bird is eating the yellow insect. This is probably because it was easier to see and catch than the green one, which is blended in with the leaf. This illustrates natural selection because a variation (green color) is giving some of the insects an advantage that will help them to survive longer and reproduce more ...
