Factory Physics Hopp Solution Manual

Operations management is an area of management concerned with designing and controlling the process of production and redesigning business operations in the production of goods or services. It involves the responsibility of ensuring that business operations are efficient in terms of using as few resources as needed and effective in terms of meeting customer requirements.

Operations management - Wikipedia

Lean manufacturing or lean production, often simply "lean", is a systematic method for the minimization of waste (muda) within a manufacturing system without sacrificing productivity, which can cause problems. Lean also takes into account waste created through overburden (muri) and waste created through unevenness in work loads (mura). Working from the perspective of the client who consumes a ...
