Force Higher Resolution

My TV booklet says it's native resolution is 1360x768 but the screen looks fine after adjusting it to way higher through nvidia. even in the resolution menu it says native resolution is much lower. oh well. if it's working im gonna keep it and not complain . thanks for the reply.

Forcing Screen Resolution Higher Than Native Resolution ...

Although Microsoft Windows operating systems come with specific resolution settings already installed, you don't have to stick with them. One way to create custom resolutions for a single display or multiple monitors is to edit the computer's registry settings.

How to Force a Resolution in Windows Using the Registry ...

Is there any way to manually force a higher resolution for my TV? I'm using a 32" HDTV for my PC display through a VGA. Originally it had a really good resolution and on the 'settings' tab of the ...

Manually Force a higher resolution? - Computer Help and ...

Now on a display that can output a maximum resolution of 1080p has about 2 million pixels while a 1440p display outputs 3.7 million. Downsampling does not increase the amount of pixels being displayed. It can't go beyond that. What it does is bring that 1440p resolution to your 1080p display and compresses it to fit inside the screen.

How to run higher than the maximum resolutions on your ...

So it makes games look better by downsampling higher resolution to a 1080p display, but no way of taking screenshots in that higher resolution? Also seems a bit farfetched that it will function within a webbrowser.

Can I force my screen into a higher than native resolution ...

So hello guys, I just have one question about screen resolution. Is it good to force a screen resolution higher than the native resolution? Cause I have a 1366x768 monitor and I want to make it to 1920x1080. And I found out that you can change the resolution higher than the native screen resolution thru NVIDIA Control Panel, but the question is;

Forcing screen resolution higher than the native ...

Run PC Games at a Higher Resolution Than Your Monitor Supports. [For example,] Your display is natively able to support a resolution up to 1920x1080. Using Downsampling it will send out a signal to tell your display to output a resolution of 2560x1440. Now on a display that can output a maximum resolution of 1080p has about 2 million pixels...

Run PC Games at a Higher Resolution Than Your Monitor Supports

1. My native resolution on this laptop is 1366x768, but in the launcher, the only closest resolutions that the game offers are 1280x720 and 1360x768, both of which produce a very eye-straining blur on the screen due to the game not running at the same resolution as my monitor. Is there some config file I can edit to force the game to run at the proper resolution?
