of asking the question is to ask for the range of the function. How to find it: a) find critical points (x-values where the derivative = 0 or is not defined). b) use 1st derivative test to determine x-values when the function is increasing/decreasing. c) evaluate function at critical points and at the endpoints. This may involve using the

K. Function Analysis What you are finding

71. Let g be a strictly decreasing function such that $g(x) < 0$ for all real numbers x . If $f(x) = (x+1)^2 g(x)$, which of the following is true? A. f has a relative minimum at $x = 1$ B. f has a relative maximum at $x = 1$ C. f will be a strictly decreasing function D. f will be a strictly increasing function E.

L. Function Analysis What you are finding

www.MasterMathMentor.com St. Schwartz 7. For the given function $f(x) = 6x^2 - x^3 + 1$, find the x-values where $f(x)$ attains a relative minimum, relative maximum, and inflection points, if any. Justify answers. 8. For the given function $f(x) = x^2 + 1 - x^2 - 16$, find the intervals where the function is increasing and decreasing. Justify your answer. 9.

AP Calculus - Functions Practice Test

Function Analysis — Classwork We now turn to the analysis of functions via calculus. We did so in precalculus by determining the roots of the function (where it crosses the x-axis) and the sign of the functions between the roots.

19 - Function Analysis.pdf - 19 Function Analysis ...

What you are finding: Typically in these problems, you work your way from the position function $x(t)$ to the velocity function $v(t)$ to the acceleration function $a(t)$ by the derivative process. Finding when a particle is stopped involves setting the velocity function $v(t) = 0$. Speed is the absolute value of velocity.

I. Horizontal and Vertical Tangent Lines How to find them ...

What is it? "Diving In" tests all concepts in the AB and BC Calculus exam in the format and difficulty of the actual exam. Only topics that have been taught to that point will be addressed. So you are assured that a straight line motion question in the derivative will not ask questions about distance traveled that requires an integral.
