Optical Pulse eNewsletter — OFS developments in optical fiber, fiber optic cable, connectivity, and specialty products across many industries for a broad audience. LightPost — “Enlightening” general news and research blog covering fiber optics, photonics and communications for a wide readership.

Optical Fiber Cable and Connectivity Solutions - OFS Optics

One end of the fiber-optic communication system has an optical transmitter (SFP module). The transmitter encodes the signal into a digital light signal. At the other end, an optical receiver (another SFP module) takes the incoming digital light signals, decodes them and sends the electrical signal to the other user's device.

Fiber-optic cables | Axis Communications

Fiber-optic communication is a method of transmitting information from one place to another by sending pulses of light through an optical fiber.The light forms an electromagnetic carrier wave that is modulated to carry information. Fiber is preferred over electrical cabling when high bandwidth, long distance, or immunity to electromagnetic interference are required.

Fiber-optic communication - Wikipedia

Fiberoptic Systems, Inc. is a leading company in the field of fiber optic applications. We manufacture a vast array of OEM products used to measure chemical compositions, perform medical procedures, measure color/physical properties, and quantify radiance in the ultra-violet(UV), visible, and infrared (IR) regions of the spectrum.
