Conic sections are the curves which can be derived from taking slices of a "double-napped" cone. (A double-napped cone, in regular English, is two cones "nose to nose", with the one cone balanced perfectly on the other.) "Section" here is used in a sense similar to that in medicine or science, where a sample (from a biopsy, for instance) is ...

### **Conic Sections: An Overview - Purplemath | Home**

Each conic section has its own standard form of an equation with x-and y-variables that you can graph on the coordinate plane. You can write the equation of a conic section if you are given key points on the graph. Being able to identify which conic section is which by just the equation is important ...
