journal papers (see, for example, Binmore and Vulkan, "Applying game theory to auto-mated negotiation," Netnomics Vol. 1, 1999, pages 1-9) but is still in a nascent stage. The automation of strategic choices enhances the need for these choices to be made efficiently, and to be robust against abuse. Game theory addresses these requirements.

### **Game Theory - London School of Economics**

In game theory, a solution concept is a formal rule for predicting how a game will be played. These predictions are called "solutions", and describe which strategies will be adopted by players and, therefore, the result of the game. The most commonly used solution concepts are equilibrium concepts, most famously Nash equilibrium.. Many solution concepts, for many games, will result in more ...
