Human Homeostasis. Adjust the levels of clothing, perspiration, and exercise to maintain a stable internal temperature as the external temperature changes. Water and blood sugar levels need to be replenished regularly, and fatigue occurs with heavy exercise. Severe hypothermia, heat stroke, or dehydration can result if internal stability is not maintained.

Students can explore questions like these in the Embryo Development Gizmo. They study the development of five embryos (chicken, fish, frog, mouse, and human) to see when they can identify each one. They can then hypothesize which organisms are more or less related. Then, students can take a closer look at embryo development in mammals.
