A food chain is a indicator of the producers and consumers of different habitats. Ask questions about the food chains of different ecosystems here.

Food Chains and Food Webs - Answers.com

Each step in a food chain or food web is called a trophic level. Producers make up the first trophic level. Consumers make up the second, third, or higher trophic levels. Each consumer depends on the trophic level below it for energy. Directions: Using your notes, textbook, and the internet, answer the following questions Procedure: 1.

Lab: Food Chains and Food Webs - Triton Science

For this lab, you will need to bring your textbook. Print the Figures, the answer sheet and question sheet.. Energy Pyramid. 1. The food web, or food chain, is an energy system, in which energy is passed along as food through a series of steps, called "trophic levels", from one consumer to the next.

Lab Seven: Food Chain and Energy Pyramid

LAB _____. FOOD CHAINS AND ENERGY IN ECOSYSTEMS All organisms need an input of energy and nutrients to live. For animals, both of these come from the food they eat. For plants the source of energy is the sun — they produce their own food through photosynthesis — and their source of nutrients is the soil.

Name Period Regents Biology Date LAB . FOOD CHAINS AND ...

Food Chains: The energy stored by producers can be passed through an ecosystem along a food chain, a series of steps in which organisms transfer energy by eating and being eaten. Food Webs: In most ecosystems, feeding relationships are more complex than can be shown in a food chain.

Lab: Food Chains and Food Webs

FOOD WEB LAB In this lab, we will be imitating a small food chain in which sunflowers represent the lowest trophic level (the producers), mice represent the primary consumers, snakes represent the secondary consumers, and cougars represent tertiary consumers. The raccoon is thrown in as an omnivore that can feed at multiple trophic levels.

FOOD WEB LAB - National Park Service

Food Chain. In this ecosystem consisting of hawks, snakes, rabbits and grass, the population of each species can be studied as part of a food chain. Disease can be introduced for any species, and the number of animals can be increased or decreased at any time, just like in the real world. Use for 5 minutes a day.

Food Chain Gizmo : Lesson Info : ExploreLearning

Lesson - Food Chains and Webs --- "What's for dinner?" Every organism needs to obtain energy in order to live. For example, plants get energy from the sun, some animals eat plants, and some animals eat other animals. A food chain is the sequence of who eats whom in a biological community (an ecosystem) to obtain nutrition.

Worksheet - 1 - New Jersey Institute of Technology

Food Webs Answer Key. Which is a consumer? Everyone in our class eats chicken, pigs, cows, fish, turkey, and all sorts of other animals.
