Mathematical modeling of tumor growth and treatment. To understand a complex multiscale nature of cancer, in which genetic mutations occurring at a subcellular level manifest themselves as functional changes at the cellular and tissue scale, mathematical and computational models are needed that are capable of integrating simultaneously multiple factors influencing tumor progression.

Integrated Mathematical Oncology @ Moffitt Cancer Center

Abiogenesis, or informally the origin of life, is the natural process by which life has arisen from non-living matter, such as simple organic compounds. While the details of this process are still unknown, the prevailing scientific hypothesis is that the transition from non-living to living entities was not a single event, but a gradual process of increasing complexity that involved molecular ...

Abiogenesis - Wikipedia

Models. SVR1 (Support Vectors Regression, parameter set 1)SVR2 (parameter set 2) XGBoost (Gradient Boosting Regression)KNR (K-Neighbours Regression)What is immediately noticeable is not only that different models are better at different prediction types, but also performance is season-dependent.

Emotion is a mental state associated with the nervous system brought on by chemical changes variously associated with thoughts, feelings, behavioural responses, and a degree of pleasure or displeasure. There is currently no scientific consensus on a definition. Emotion is often intertwined with mood, temperament, personality, disposition, and motivation. ...

Emotion - Wikipedia

Early analyses of Mo in natural waters were usually by colorimetric methods, notably following complexation of reduced Mo with phosphate or more commonly with thiocyanate ().More precise measurement of the red-orange thiocyanate complex can be obtained by UV-VIS spectrophotometry and a pre-concentration step with iso-amyl alcohol extraction.This extraction step also removed interferences from ...
