In this section of lesson students explore homologous structures and their significance as evidence for evolution by visiting Hand it to the Animals - Identifying X-rays from the zoo, a Simple Science website. Students use a program called WebImage to examine X-rays of animal hands in more detail to compare their structures.

Homologous Structures: Evidence for Evolution

Evidence of common descent of living organisms has been discovered by scientists researching in a variety of disciplines over many decades, demonstrating that all life on Earth comes from a single ancestor. This forms an important part of the evidence on which evolutionary theory rests, demonstrates that evolution does occur, and illustrates the processes that created Earth's biodiversity.

According to today's conventional scientific wisdom, time flows strictly forward — from the past to the future through the present. We can remember the past, and we can predict the future based on the past (albeit imperfectly) — but we can't perceive the future.. But if the recent data from the lab of Prof. Daryl Bem at Cornell University is correct, conventional scientific wisdom may ...
