The Galaxy S2 is Super AMOLED Plus, which goes back to RGB (what they are now calling Real Stripe, to denotes the difference from pentile). So it should (i haven't seen though) look even better than the Super AMOLED screen. It has the same resolution (480x800), but more subpixels (and more pentile).

A useful setting for the Samsung Galaxy tablet's Camera app that most people ignore is the image resolution. That setting is routinely ignored on digital cameras as well, mostly because people don't understand resolution. You don't always need to use the highest resolution. High-resolution images are great for printing photos and for photo editing.
