Much work in expert systems has been based on subjective probability and fuzzy set ideas. This makes it difficult to perform statistical tests on the correctness of these systems, which reduces their scientific value although it makes them com more...

Objective probabilities in expert systems - dl.acm.org
In artificial intelligence, an expert system is a computer system that emulates the decision-making ability of a human expert. Expert systems are designed to solve complex problems by reasoning through bodies of knowledge, represented mainly as if–then rules rather than through conventional procedural code. The first expert systems were created in the 1970s and then proliferated in the 1980s.
