Force Higher Resolution Windows Xp
Close all windows Restart Windows. If you have problems; If the new resolution you've set isn't support or you have any other problems, restart windows and repetively press F8 right after the BIOS is loaded. It will show you a debug menu. Select VGA mode option.

windows xp - Force a custom resolution - Super User
Force native resolution to Non-PnP monitor in Windows. But I cannot set it to a resolution higher than 1024 x 768! I then tested it with another monitor--a 20-inch, 1680 x 1050 Dell--which was detected successfully and did run at its native resolution. So, the problem is the monitor, not the computer or video card.

Force native resolution to Non-PnP monitor in Windows ...
force high resolution on boot (no monitor) Windows XP Video. Chris Campbell wrote: > >The extender is of course SVGA capable, sorry about using shorthand

force high resolution on boot (no monitor) - Windows XP Video
Similarly if I have the KVM switched to the XP machine and power on, it is all good. Display properties are correct, showing the max resolution at 1440x900. I have a feeling that it is the KVM that is responsible for this, however it would be really good if there was some way I could force the resolution to 1440x900.

Force a screen resolution? - Microsoft: Windows - Tek-Tips
I ran the windows install for the drivers, and it claims they are up to date. The drivers are rather old, 2006, but it claims they are up to date. I'm just confused as to how I was able to get my desired resolution in Window XP and 7 Professional without an issue, but Premium is giving me all sorts of grief.

Force Resolution? | Windows Forum
I have one of those switch views set up to toggle one monitor between two machines and it seems to be stripping off some of the information from the monitor. The monitor's native resolution is 1920x1080@60hz but Windows refuses to let me set it to anything higher than 25hz interlaced, which looks absolutely terrible.

Force display resolution in Windows / C++ - Stack Overflow
I have a 13.3" (1280x800) LCD screen on my laptop, and Windows 7 only offers me 800x600 or 1024x768. 800x600 is blurry as anything, and 1024x768 is proportionally wrong for my monitor and things appear stretched horizontally. Is there a solution to be able to set a resolution that would be ... · Well, the Sony's are very proprietary with repect to ...

Is there a way to force screen resolution?
